VALVE REPAIR

TUBE SERVICES

GREAT PRODUCTS ARE ONLY PART OF OUR SUCCESS.

YOU SHOULD MEET OUR PEOPLE.

From the machinist with over 20 years experience on the lathe, to job foremen who have worked dozens of plant outages, combined we make one of the most knowledgeable and skilled valve service companies in America. Our team has repaired tens of thousands of valves in our shop and at customer facilities. Many of our employees have worked in the industries we serve and understand the importance of keeping project costs down and your production levels up. We have the experience necessary to fulfill your immediate requirements for valve services and a large inventory available for fast delivery of replacement parts. Working with Flotech you are adding valve experts to your team and a strong customer commitment to a lasting partnership for safety and performance.

VALVE SERVICES

Valve manufacture, repair, maintenance, actuation and certification shops, including in-plant repair services. Safety and pressure relief valve testing.

VALVES, ACTUATION AND CONTROLS

Mounting new actuators on valves, repairing operators and valve controls is our specialty. Pneumatic, electric & hydraulic actuation options to fit any application need. Discrete & network controls, instrumentation & position sensing/monitoring.

TUBE SERVICES

Repair, retube and manufacturing of heat exchangers, tube bending, fabrication and welding services.

175,000 SQUARE FEET

Largest Valve and Automation Shop in the Southeast

Frank Driggers Richard Bazar Herb Goelz

We stand on the shoulders of giants.

These guys started with a focus on providing great customer service that continues today.

A LONG HISTORY OF EXCELLENT CUSTOMER SERVICE

Flotech began as Gulf Atlantic Valve in 1961 with a small dedicated crew repairing valves in Florida for marine and industrial customers. Herb Goelz, the founder, hired Richard Bazar and Frank Driggers to help grow it into the valve service and distribution powerhouse it is today.

Service work on valves has always been the core of our business. We purchased the Space Castings foundry business to provide high-temperature metal castings for local mills. Our foundry product line expanded to include specialty valves, boiler parts, and flanged fittings. W&O Engineering was next - a tube and retube operation equipped to repair, clean or build new heat exchangers, condensers and chillers. With the combination of valve expertise, in-house foundry capabilities, and complete tube services we were becoming a true full-service center for our customers' requirements.

Complementing our service work we have added a new valve and automation division, committed to stocking and delivering new valves, actuation, and parts.

Our reputation for high-quality valve service led to opportunities beyond our home base in Jacksonville. A second manual and safety valve servicing facility was opened in Charleston, SC. and recently we opened a repair facility and additional VR shop in Mobile, AL.

The valve, foundry, tube, and fabrication businesses were consolidated under the Flotech name in 1975. Today Flotech provides valve repair, safety valve certification, actuation, control valve repair and new valves from three locations throughout the Southeast. We are committed to providing excellent customer service, a dependable and trained team of technicians, and the best products in the industry.

Caleb Goelz, CEO

VALVE SERVICES

Flotech operates customer service centers in Jacksonville, FL, Mobile, AL and Charleston, SC. We provide complete valve repair, valve actuation, modification, certification and testing. Our mobile valve repair units allow us to work anywhere you need us.

FLOTECH EXCHANGE PROGRAM

Flotech offers a quick turnaround option of exchanging safety relief valves for one of our rebuilt certified valves. The Flo-Xchange Program is unique in the industry. The customer decides the best service option available based on their needs. Need a new remanufactured valve immediately or have a planned outage with a short window of time? Our program allows for multiple valves to be delivered in advance, with the exchanged valves being picked up during or after the outage. Flotech works with each customer on the best scenario to eliminate downtime and unknown costs.

CONTROL VALVES AND MANUAL VALVES

We specialize in the repair, refurbishing and certification of control valves: V-Ball type and diaphragm control valves (Fisher, Neles, Jamesbury, Dezurik, Masoneilan, etc) . Our valve experts focus on getting your valves tested, repaired and quickly set to the exact specifications.

FACTORY AUTHORIZED RELIEF VALVE ASSEMBLY AND SAFETY VALVE FACILITY:

ASME and national board-certified shop always available for quickly setting your valves.

- Online valve field testing.
- New safety and pressure relief valves for same day shipment.

Most industry-standard springs, rings and other replaceable relief valve parts are available from stock. Our valve experts work with you to document your maintenance history, reduce your downtime and shorten the interval between valve repairs.

REMANUFACTURED AND NEW SAFETY VALVES

We have decades of experience rebuilding safety valves and pressure relief valves that are tested and certified in our VR facility to OEM specifications.

Our trained valve technicians repair, set, and recertify each safety valve at your plant location (in-line) or at our facility. We certify both ASME Section I and VIII code stamped safety valves. We maintain a huge inventory of the major manufacturers in the industry. Remanufactured valves reduce customer downtime, save money and have a one year warranty.

Flotech is an authorized Limitorque Distributor and Limitorque Blue Ribbon Service Center ready to serve you with a team of factory trained technicians.

We specialize in providing turn-key repair solutions and full valve automation packages. Our field service teams can perform this service at your facility or within our shop.

Valve Information Portal - Online, any device access to your safety valve repair history and test reports.

CONTROL VALVE EXPERTISE

Repair, rebuild and calibrate control valves to factory specifications to help your plant achieve maximum capacity with a minimal risk of downtime.

VALVE AND AUTOMATION SALES

WE STOCK NEW VALVES AND PARTS IN INVENTORY

MUNICIPAL AND WATERWORKS

Flotech delivers quality valve products and innovative piping solutions to municipal, water, wastewater and stormwater management organizations. We represent some of the best valve manufacturers in the business and have the field service organization to keep your facility running efficiently. Private and public water authorities, public works contractors, waterworks engineers, and utility contractors count on Flotech because of our commitment to inventory, training and world-class customer service.

INDUSTRIAL AND MUNICIPAL SALES TEAM

Our industrial and municipal sales team has decades of experience in valve and actuation sizing and process applications. Customer service and satisfaction are paramount.

CNC & MACHINING CAPABILITIES

Our machine shop and experienced machinists are ready to manufacture parts to your unique specifications. We have boring mills to handle diameters up to 84" and lathes that can machine up to 40 foot material. Our computerized equipment includes CNC lathes and CNC machining centers. Fabrication and welding of almost every part can be performed in house.

OUR SHOP WILL COME TO YOU.

Having the right people is essential, having the best equipment is important, making it all portable can make the difference in repairing your valves quickly and efficiently. Our field service units are well equipped to come to your facility and save time during your critical outage window.

OUTAGE IS OUR BUSINESS

Our board-certified field service people not only arrive quickly at your site for reliable repair work, but understand the importance of communication with your team and the proper repair service.

TRAINING & EDUCATION

Flotech conducts training and education for your staff on-site or at one of our training centers. Some classes qualify for engineering continuing education credits.

CERTIFICATION

Flotech maintains current certifications for valves, valve repairs, and valve testing per standards of ASME and the National Board of Boiler & Pressure Vessel Inspectors.

TUBE SERVICES

Professional, reliable and dependable is what you should expect from our tube services division when working on your equipment in one of our facilities or at your plant location. During an outage, or planned maintenance, our staff will coordinate the service to your equipment within the agreed time frame.

Flotech has a Certificate of Authorization from the National Board of Boiler and Pressure Vessel Inspectors to use the "R" stamp for repair and/or alteration of existing code stamped heat transfer equipment. Work performed on commercial type equipment to specific customer requirements also follows the guidelines of the ASME Code-accepted quality system. These guidelines ensure that inspection, testing and manufacturing procedures are performed by qualified personnel.

Flotech Tube Services is dedicated to manufacturing, repairing, replacing or retubing heat exchangers, surface condensers, coolers, chillers and all types of heat transfer vessels for heavy industry and marine applications.

Call your local Flotech representative for availability in your area.
